RISK ASSESSMENT

Is Social Distancing still a requirement by the local Public Health Authorities?

Yes. The City of Ottawa is in Phase 2 of re-opening and we are still required to maintain a 2 metre distance from one another.

Will training be held on multiple fields?

Yes. Ottawa TFC will train on seven fields and one turf field located at Millenium Park and four fields at Frank DuPont park. Both parks are city-owned.

Is community spread still a concern in the municipality?

Yes, however, we have moved to Phase 2, which means the number of cases has been steadily decreasing.

Will training include a significant number of participants (athletes or coaches) at higher risk of severe COVID-19 disease (e.g., people over 65 years of age or people with underlying health conditions)?

No. Our club trains children from the ages of 5-18, who are in good health. Our coaches are between the ages of 15-55 and are in good or excellent physical condition.

Will training include drills that are considered at higher risk of spread for COVID-19 (eg, contact, close proximity)?

No. Canada Soccer has approved Ontario Soccer's Return to Play document and Ottawa TFC is modeling its Return to Play process after this document. Ottawa TFC is entering Phase 1 of the process which requires social distancing measures to be in place.

Will the event be held indoors?

No. Our training will be held outdoors at Millenium and Frank DuPont fields.

UNDERSTANDING OF THE OVERVIEW OF THE CURRENT COVID-19 SITUATION BY THE CLUB / EVENT ORGANIZERS

Have the relevant organizers and responsible staff been informed about the latest available guidance on the COVID-19 outbreak (official web resources available from Government of Canada and local public health authorities)? And are the organizers and staff concerned committed to following the available guidance?

Yes. All responsible staff and organizers receive regular updates from the City of Ottawa's Public Health office (ottawapublichealth.ca). We are also reviewing CBC News, on a daily basis for provincial updates (cbc.ca). We also review Ontario Soccer's public health updates as they relate to soccer and our district (EODSA). We are all committed to integrating the guidance into our soccer operations.

Are organizers aware of global and local daily situation reports as provided by local public health authorities?

Yes. As mentioned, we review all global and local situation reports on a daily basis.

Do the organizers and responsible staff understand the risks and transmission routes of COVID-19, the steps that attendees can take to limit spread, the recognized best practices (including respiratory etiquette, hand hygiene, physical distancing, etc.), and any travel restrictions in place?

Yes. The organizers and responsible staff hold regular conversations to ensure that we all understand the risks, best practices and travel restrictions. We are working collaboratively to ensure that we implement all required measures in a consistent and methodical manner.

EMERGENCY PREPAREDNESS AND RESPONSE PLANS

Has a club medical response plan for COVID-19 been developed?

Yes. The attached Emergency Response Plan (*Appendix A*) includes a medical response plan for a positive COVID test. The Ottawa TFC Health and Safety Officer (HSO) is the single point of contact for implementing the Emergency Response Plan.

Personal protective equipment (e.g. masks, gloves,) for onsite medical personnel where deployed

Personal protective equipment is located in the Clubhouse next to Millenium Park and will be deployed in cases when assisting an injured player or in other circumstances. Personal protective equipment will be provided to responsible staff when training at the Frank DuPont field. As we are in Phase 1 of the Return to Play process, there is no contact between players and coaches, therefore, we do not anticipate medical personnel being present, on the field at this time.

Hand sanitizer and alcohol rubs/gels, tissues, frequently replaced soap canisters and closed bins for safe disposal of hygienic materials (e.g. tissues, towels, sanitary products) in washrooms and changing rooms

The change rooms will remain closed during Phases 1 and 2 of the soccer re-opening, and the clubhouse bathroom has a limit of one person at a time. The clubhouse, including the bathroom is equipped with alcohol gels, tissues, disposable soap canisters and a closed garbage can.

Hand sanitizers and alcohol rubs for all entrances and throughout the venue

All players and parents are expected to have their own hand sanitizers. Players and parents will sanitize their hands when arriving and departing the parks. Sanitizing gel will also be available at the fields if players forget their own.

Is there a procedure for athletes or staff to clearly identify whom to contact and how to do so if they or other participants feel unwell?

Yes. Please see Ottawa TFC Illness Protocol (*Appendix B*).

Is there a protocol in the Province or Municipality to report suspected cases and request testing and epidemiological investigations?

The province of Ontario has a self-assessment tool that can be completed to determine if an individual should get tested for COVID-19. If the answer is 'yes', the individual will be directed to the nearest testing centre at St. Patrick's Catholic Intermediate School, 1485 Heron Road, Ottawa East.

Are first-aid services or other medical services in-place and equipped to support patients with respiratory symptoms?

We do not have this type of equipment on-hand at the clubhouse or at the fields. However, we have access to 911 and ambulance service which can be called upon if a respiratory crisis occurs.

Are there any designated medical facilities that manage patients with COVID-19 infection in the Province or Municipality?

Yes. All of our hospitals are equipped to handle patients with COVID-19 infection.

Are there transportation services with trained medical professionals available to transport critically ill patients with severe acute respiratory infections to a hospital, if necessary?

Yes. Our city has ambulance service with paramedics.

Has a cleaning schedule been developed to ensure the venue is clean and hygienic – wiping surfaces and any equipment regularly with disinfectant is strongly recommended (before, during and after training and between each group attending the venue)?

Yes. Our clubhouse is cleaned regularly by a professional cleaner and we will have a Field Marshall at all of our fields equipped with disinfecting and sanitizing equipment. The balls, goal posts, pinnies and any other equipment will be cleaned before, during and after every practice.

Are there established screening measures, including temperature checks in place for participants at the point of entry or drop-off, in venue, on-site medical facilities (first-aid points)? (Please specify in Comments what these screening measures include) - Comment: We are in communication with local hospital to provide us with temperature thermometers with sanitation equipment/tools and face covering masks that we can use at field locations, if/when it's needed and/or required

Ottawa TFC will be using the Ottawa Public Health Questionnaire (Appendix C) for all players and coaches. This questionnaire will be posted at our website and will be sent to all players as part of the daily TeamSnap training schedule reminder.

When players arrive at the field, there will one entrance for drop-off and one entrance for departure. Players will be required to answer the questions in the questionnaire prior to entering the field, if they have not already completed the questionnaire.

As has been our practice to date, all fields will have at least one medical kit for emergencies and will be equipped with masks and gloves.

Does the medical response plan include protocols for organizers to notify all participants of possible exposure to COVID-19 if the organizers are made aware of any suspected or confirmed cases that attended training?

Yes. The scheduling software, TeamSnap, will be used to determine which players are attending each practice.

We will ask parents not to remain at the field for the practice, thereby minimizing risk of contact.

Organizers will have a copy of the Illness protocol and will follow the required steps.

Players on the same field as a player/coach/staff identified with COVID-like symptoms or exposure to someone with COVID-19 will be informed by email. An email will also be sent to players who practice with a player/coach/staff who tests positive for COVID-19.

STAKEHOLDER AND PARTNER COORDINATION

Is there an established mechanism for collaboration and coordination between the health sectors and the Provincial and Territorial Member Association?

Yes. Ontario Soccer is in regular contact with Public Health Ontario, who is in regular contact with local public health offices.

Are there agreed, clear and easily understood processes in place for reporting to external multi-sectoral stakeholders (Including public health and sport governing bodies) and disseminating risk communication messages ?

Yes. Both the Ottawa Public Health and Ontario Soccer have websites that provide regular updates and clear and easy-to-follow instructions. Ontario Soccer has provided a comprehensive “Return to Play” document that provides a template for reporting to external stakeholders.

Is the facility/venue managed by the local municipal authority?

Yes. Both Millenium and Frank DuPont parks are managed by the City of Ottawa. The Ottawa TFC clubhouse is owned and managed by Ottawa TFC.

GOVERNANCE

Is there a decision-making authority/body and an agreed procedure to modify, restrict, postpone or cancel club and/or training events related to the evolving COVID-19 outbreak?

Yes.

- 1. The General Manager, who reports to the Board of Directors, is the first level authority to modify, restrict, postpone or cancel club and/or training events.**
- 2. The Technical Director is the second level authority and can modify, restrict, postpone or cancel club and/or training events, once the General Managers has conferred these authorities.**
- 3. Once a decision is made, by either the General Manager or Technical Director, coaches and team managers will be informed and they will inform the players/parents either by email or phone.**
- 4. Relevant messaging will be posted at the website.**

Have the club and facility organizers and staff undergone training and exercises on personal safety procedures and emergency mitigation measures (including those specifically listed in this checklist)?

Yes. The Ottawa TFC Health and Safety Officer has met with organizers to explain all safety procedures and emergency mitigation measures as outlined in the Emergency Preparedness Plan and the Illness protocol.

RISK COMMUNICATION

Has coordination been set up with local media channels and social media sites such as Twitter, Facebook and Instagram so that messaging can be coordinated to provide targeted messaging from organizers (including proactive messaging about the status of club events, including changes and cancellations)?

Yes. Ottawa TFC uses a scheduling software, TeamSnap, and our website as the main communication tools for our members. We also use twitter and Instagram to communicate important events and activities.

Has there been monitoring of local media and social media established for rumours or negativity to be able to counter them early? (Please explain in the comments what protocols are in place for counter messaging) - Comment: Our Club manager is in-charge of this.

Yes. As we have a skills-based Board of Directors, we always have one board member who has communications expertise. In this situation, the board member is monitoring communications related to the pandemic. Regular communications posts are added to website as new information becomes available. Members are encouraged to write or call a board member, the General Manager, or Technical Director to clarify any questions or concerns related to the pandemic.

Is there a designated person(s) to lead media activities and tasked with managing all external communications with Provincial and Municipal government officials, the general public, and the media? (If yes, please identify the spokesperson in comments) - Comment: Our club manager is championing this.

Yes. The President and board member with communications expertise is the liaison for external communications for the club. Both positions work closely with the General Manager for all messaging.

Is there a risk communication strategy for the club and/or facility in regard to COVID-19?

Yes. Please see Ottawa TFC Risk Communication Strategy (*Appendix D*).

PUBLIC HEALTH AWARENESS OF COVID-19

Has advice included information on the meaning of the following measures: quarantine, self-isolation and self-monitoring?

The City of Ottawa’s local health authorities have communicated the meanings of these terms and when they should be applied. Ottawa TFC has posted this information at our website and in the document Illness protocol.

Has information on the at-risk populations been provided to all staff involved in the club and facilities, athletes, officials, and others so they may make an informed decision on their attendance based on their personal risks?

Ontario Soccer has provided regular updates to all of its members, including Ottawa TFC. There is reference to what constitutes an “at-risk” individual. These communications are shared with staff, organizers and members at the website. Everyone is free to make a decision as to whether or not they attend a training session or event without any negative repercussion.

Has public health advice on clinical features of COVID-19, preventive measures, especially respiratory etiquette, hand hygiene practices, and physical distancing, been shared with all staff involved in the club and facilities, athletes, officials, and personnel of all relevant stakeholders?

Yes. The Ottawa TFC Health and Safety Officer has shared this information with staff. As well, the local public health office provides regular communications on these measures. The information is communicated on television, social media, newspapers, road signs and email. Ottawa TFC resends these to staff.

SPECIFIC MITIGATION MEASURES

Have return to train health checks been performed on all athletes to ensure underlying co-morbidities, medications, allergies, etc. are documented?

All athletes will be required to complete or update their medical record prior to training this season. These forms will be held by the team managers, and any underlying co-morbidities, medications, allergies will be communicated to the coach and organizers.

Is there a plan to monitor the number of participants in the venue/facility where restrictions for gatherings are in place locally?

Yes. The club's staff will be present at every session and event during Phases 1 and 2 to ensure that schedules and rules are followed. Groups will be scheduled in such a way that the group of 10 requirement is adhered to with a maximum of 4 groups per full sized soccer field.

Will only one team/age group participate at any one session?

With 7 full sized fields at our disposal in a single location, we will be able to schedule entire age groups to train at the same time while ensuring social distancing. Players will be grouped by team or like-minded groups, respecting at all times that no more than 10 players can form a part of any group.

Does the facility/venue require a permit from the local authorities?

Yes.

Has the training schedule been adapted to meet social distancing requirements?

Yes, as described above, we will be leveraging the large number of fields to ensure that social distancing is adhered to. With a substantially lower registration rate for this year, it will be easier to schedule groups in a way that gives ample space to all players, staff and coaches.

Are all specific Provincial, Territorial, Municipal Health Authority requirements being met?

Yes.

Will all designated seating and/or spectator areas be closed?

During Phases 1 and 2, not only will these areas be closed, but parents will be asked to remain no closer than the parking lots (in their cars). Further decisions beyond Phase 1 will be in line with local gathering restrictions.

Will the training only be open to athletes and officials?

Training will only be open to athletes and officials in Phases 1 and 2. For phase 3, certain events will be open to parents under rules and restrictions that adhere to social distancing requirements at that time.

Will athletes be given closed containers to allow for the safe disposal or storing of all hygienic materials (e.g. tissues, towels, etc.)?

Our fields are equipped with garbage cans. Athletes (and their parents) will also be asked to bring their own closed containers for this purpose, and to dispose of such materials safely themselves.

Are there measures in place to eliminate the sharing of equipment, water bottles, towels, etc.?

Players will leave their bags and bottles at 2m distances marked by visible markers at the side of each field. Player bottles and any individual equipment will remain at those locations for the duration of the event. Each player's bottle will be marked with their name.

Will the athletes be separated from other groups, such as officials, facility and club support staff, to limit transmission?

Yes, as mentioned, players will train in groups of no more than 10, and those will remain their training groups throughout the duration of Phase 1.

In Phase 2, we will continue to adhere to smaller groups, and will only increase the size of training groups with the advice and permission of our local health authorities.

Will there be daily health checks of club and facility staff, athletes, and officials?

Yes. The COVID-19 questionnaire will be completed by all staff and coaches upon arrival.

Players will also complete a questionnaire upon arrival during Phase 1.

Have formal communications been established with local Public Health Authorities regarding plans to resume activities?

The City of Ottawa public health and parks and recreation offices, communicated to residents that sports fields will be open and activities such as soccer may resume with social distancing.

Ottawa TFC is working in collaboration with Ontario Soccer and the City of Ottawa to ensure that both governing bodies' requirements are met.

We are in communication with both Ontario Soccer and the city in this regard.

APPENDICES

APPENDIX	TITLE	PAGES
A	OTTAWA TFC EMERGENCY RESPONSE PLAN TO COVID-19	15-18
B	OTTAWA TFC ILLNESS PROTOCOL	19-20
C	COVID-19 EMPLOYEE SCREENING QUESTIONNAIRE	21
D	OTTAWA TFC RISK COMMUNICATION STRATEGY	22-24

APPENDIX A

OTTAWA TFC EMERGENCY RESPONSE PLAN TO COVID-19

This plan applies to all members who include: players, coaches, staff, parents, organizers and volunteers.

Roles and Responsibilities

Health and Safety Officer - Ottawa TFC's single point of contact for the Emergency Response Plan is the Health and Safety Officer (HSO). The HSO is the lead for all steps in this plan unless otherwise noted.

President- The President is responsible for all communications, both internal and external to the Club. All inquiries and should be direct to the President.

General Manager- The General Manager is sole authority to modify, restrict, postpone or cancel club and/or training events. The General Manager may confer these authorities to the Technical Director, at any time.

STEP 1 – Self-report to the Ottawa TFC Health and Safety Officer (HSO)

A member should stay home and contact a person in authority if the if you have:

- symptoms of COVID-19, or
- positive test for COVID-19 is recorded, or
- had exposure to someone with COVID-19 within the last 14 days.

Implement the illness protocol and advise individuals to:

- self-isolate
- monitor symptoms daily, report respiratory illness and not return to activity for at least 14 days since your last exposure OR 14 days after your symptoms started, whichever is longer AND you have no fever AND your symptoms are improving
- use COVID-19 self-assessment tool ([click here](#)) to help determine if further assessment or resting for COVID-19 is needed.

CONFIRMED POSITIVE TEST

STEP 2 – Sick members are to stay home

Sick members are not permitted to return until they meet Public Health Agency of Canada and provincial health authority guidelines which includes a negative test result.

STEP 3 – Isolate and/or transport those who are sick at club activities

Clearly communicate to members and their families that sick individuals are not permitted to attend a Club activity. They should notify officials if they, or their child (families), become sick with COVID-19 symptoms, test positive for COVID-19, or have been exposed to someone with COVID-19 symptoms or a confirmed or suspected case.

Coaches, staff, officials, and players with COVID-19 symptoms (i.e., fever, cough, shortness of breath) at any club activity must be immediately separated and isolated. Individuals who are sick should go home or to a healthcare facility, depending on how severe their symptoms are, contact their Family Physician, and follow [Health Agency guidance for caring for oneself](#) and others who are sick.

Establish procedures for safely transporting anyone who is sick to their home or to a healthcare facility, including, having parent contact information readily available and/or parents within a safe, socially distanced but easily accessible waiting area. If an ambulance is called, alert attendants that the person may have COVID- 19.

STEP 4 – Clean and disinfect areas

Close off areas used by a sick person and do not use these areas until after cleaned and disinfected (for outdoor areas, this includes surfaces or shared objects in the area).

Ensure safe and correct use and storage of cleaning and disinfection products, including storing them securely away from children.

STEP 5 – Notify local health officials, Ontario Soccer and [Close Contacts](#)

Notify local health officials, club staff, officials, Ontario Soccer, and families immediately of any case of COVID-19 while maintaining confidentiality in accordance with applicable federal, provincial and territorial privacy and confidentiality laws and regulations.

Share emails of players/coaches/staff, on the same field as the sick member, with local health officials. Ottawa TFC will keep all records of waivers, medical assessment forms, as well as attendance of all participants participating on the fields or venues.

The club will be responsible for advising those who have had close contact with a person diagnosed with COVID-19 and determine whether someone should stay home and self-monitor for symptoms. Members of the Club will continue to self-monitor for symptoms.

Institute a weekly reporting system at the club website to advise of any suspected COVID 19 cases.

POST-PANDEMIC PHASE

STEP 6 – Confirm Provincial Health Officer has declared the COVID-19 pandemic is over.

Communicate with external health organizations to verify that the pandemic is over.

STEP 7 – Inform membership pandemic is over

The President will send an official notice to the membership (i.e., volunteers, staff, coaches, parents, players, match officials) that the pandemic is officially over, the province's state of emergency order has been lifted and soccer activities can resume its full operations.

Note: During this phase, there may be specific sport protocols to follow from Canada Soccer/Ontario Soccer and/or the Provincial health authorities (i.e., implementation of Infection Control Policies and Procedures)

STEP 8: Conduct a review of the Process

Conduct a full review of our COVID-19 Return to Play Implementation Plan as well as our COVID-19 Emergency Response Plan. Include a list of recommendations for improvements.

STEP 9: Update our Emergency Response Plan

Implement any recommendations for improvement and have it approved.

APPENDIX B

OTTAWA TFC ILLNESS PROTOCOL

A “member” is any Ottawa TFC player, parent, coach, organizer or volunteer.

1. Inform someone in a position of authority (coach, team manager or organizer) immediately if you feel any symptoms of COVID-19 (such as fever, chills, cough, shortness of breath, sore throat and painful swallowing, stuffy or runny nose, loss of sense of smell, headache, muscle aches, fatigue and loss of appetite) **or if you have been tested for COVID-19 and are waiting for results.**

- **Self-isolate** and do not go to the practice/facility/workplace even if your symptoms are mild.
- **Self-monitor** and complete the COVID-19 questionnaire [Ontario COVID-19 self-assessment](#).
- As per Ottawa Public Health, anyone with of COVID-19 symptoms is encouraged to complete proper testing. Location of COVID-19 testing facilities can be found on the [Ottawa Public Health](#) website.
- **Contact City of Ottawa 311** for further instructions.
- Close off, clean and disinfect the practice/facility/work area immediately and any surfaces that could have potentially been infected/touched.

2. If a member tests positive for COVID-19

- **Self-isolate** and do not return to the practice/facility/workplace until you meet the Ottawa Public Health guidelines to discontinue self-isolation which includes a negative test result.
- **Inform someone in a position of authority (Coach, team manager or organizer)** The Ottawa TFC Health and Safety Officer will be notified so that any club members who work/play closely with you can be notified and removed from the practice/facility/workplace for at least 14 days to ensure the infection does not spread further.
- **Close off, clean and disinfect** their practice/facility/work area immediately and any surfaces that could have potentially been infected/touched.

3. If a member has come in to contact with someone who is confirmed to have COVID-19

- **Inform someone in authority** (coach, team manager, employer) and **stay home**.
- If the contact is confirmed, the member must **quarantine** for at least 14 days or as otherwise directed by health authorities. Any members who may have come into close contact with the member will also be **quarantined for 14 days**.
- **Close off, clean and disinfect** their practice/facility/work area immediately and any surfaces that could have potentially been infected/touched.

4. A member should also quarantine or self-isolate if:

- **You have travelled outside of Canada within the last 14 days**
- **Anyone in your household is showing symptoms of COVID-19**

APPENDIX C

COVID-19 EMPLOYEE SCREENING QUESTIONNAIRE

COVID-19 NOVEL CORONAVIRUS
Please complete the following questions before beginning your work today.

Name:

Date: Time:

Do you have any of the following:

Fever

Cough

Shortness of breath

Sore throat

Runny nose

Feeling unwell

Yes Have you been in close contact with someone who is sick or has confirmed COVID-19 in the past 14 days?
No

Yes Have you returned from travel outside Canada in the past 14 days?
No

If you answered **YES** to any of these questions, go home & self-isolate right away. Visit OttawaPublicHealth.ca/Coronavirus for more information as you may be eligible for a COVID-19 test.

If feeling unwell, contact your health care provider or call Telehealth Ontario at 1-866-797-0000 to speak to a registered nurse.

APPENDIX D OTTAWA TFC RISK COMMUNICATION STRATEGY

Ottawa TFC's risk communication strategy is comprised of three steps:

Step 1: **DEFINE**

Step 2: **UNDERSTAND**

Step 3: **CONNECT**

STEP 1. **DEFINE** OUR RISK COMMUNICATION AUDIENCE AND GOAL

Challenge: What is our biggest communication challenge?

- **Ensuring that parents, players, coaches and organizers are aware of COVID-19 practices to ensure that all possible risks of infection are avoided.**

Audience: Who do we want to reach?

- **All parents, players, coaches and organizers at Ottawa TFC.**

Goal: What do we want to accomplish?

- **To ensure that no member of our community is at risk of getting COVID-19 as a result of a club activity.**

STEP 2. **UNDERSTAND** OUR AUDIENCE.

What do they care about most that could be impacted?

- **Our priority audience is parents, players, coaches and organizers who do not want to contract COVID-19 during a club activity.**

What is their experience with COVID-19?

- **Parents, players, coaches and organizers have been well sensitized to the importance of quarantine, self-isolation, self-monitoring and social distancing as well as washing of hands.**

What health impacts are they concerned about?

- **Players, parents, coaches and organizers are concerned about maintaining good health and not contracting COVID-19.**

Who do they trust for risk and preparedness information?

- **Ottawa Public Health has issued regular reports of cases, hospitalizations and deaths. They are well respected in providing useful and timely data that citizens have used to make informed choices.**

Where do they get information on risks?

- **Public health websites and local newspapers have provided timely reports on the state of COVID in Ottawa.**

Do they have a community-or individual-focused world view?

- **Parents, players, organizers and coaches have developed an individually focused worldview but they have also shaped their views of COVID-19 issues based on a community-focused worldview.**

How prepared are the members?

- **The parents and players are generally aware and relatively well-prepared for a COVID-19 issue. They use masks, wash their hands repeatedly, practice social distancing and will take necessary action to minimize their risk.**

STEP 3: CONNECT WITH OUR AUDIENCE ABOUT RISKS

We understand that risk communication is an ongoing process, not just a catchy message or one-time event.

We also know that successful risk communication efforts require multiple interactions with our audience using multiple communication vehicles to reach our risk communication goals.

What opportunities exist for us to better connect with our audience?

- **Consequently, the club intends to remain in constant communication with parents and players through TeamSnap, our website and email, as appropriate.**

How will we help our priority audience identify their risk-reduction options?

We will post and share information, including:

- **Preventative measures that will inform parents and players on the dos' and don'ts and best public health practices to avoid contracting COVID-19, such as washing/sanitizing hands, wearing masks, not touching another person's equipment, etc..**
- **Actions that the club is taking to reduce the risk of contracting COVID-19, such as entry/exit to the field, where to store equipment/water bottles, where parents and spectators can stay.**
- **A health questionnaire that will ask if players have a temperature, etc. This questionnaire will also be asked when players approach the playing field.**

PLAY SAFE, STAY SAFE!
